

Exclusive Corporation

M-Comp A/S in exclusive corporation with Diamond Systems Corporation

M-Comp A/S intensifies corporation with new as well as well-known suppliers. The suppliers are all proactive partners, who together with M-Comp A/S, are ready to invest time and knowledge in customer projects, as they contribute with commitment, knowledge, and information, so together we can create the optimal products and solutions for our customers. M-Comp A/S, our suppliers and customers have a clear common goal: to offer the best solution at the right price.

M-Comp A/S has made an exclusive agreement with Diamond Systems Corporation. Since 1989, Silicon Valley-based Diamond Systems Corporation has provided compact, rugged, board- and system-level real world embedded computing solutions to companies in a broad range of markets, including transportation, energy, aerospace, defense, manufacturing, medical and research.

The company is renowned as an innovator of embedded I/O standards and technologies; it was an early adopter of PC/104 module technology, originated the FeaturePak I/O module and RSODIMM rugged memory module standards, and holds a patent for a unique analog I/O autocalibration technique.

Founder & CEO
Jonathan Miller

Diamond's extensive product line includes compact, highly integrated single board computers (SBCs); an extensive line of expansion modules for analog and digital I/O, wired and wireless communications including multiprotocol serial ports and Ethernet switches, GPS, solid-state disk, and power supply functions; and complete, rugged, system-level solutions.

The exclusive corporation with Diamond Systems Corporation opens many new exciting opportunities and projects – particularly in M-Comp A/S main focus areas: Transportation and manufacturing. We look forward to present these exciting opportunities to the market.
