THE DIGITAL ONLINE HOTEL ROOM

It's finally here !
The TABLET for the In-Room Digital Directory

Interactive, innovative og informative!

Guestmanager goes beyond the conventional guestbook and information leaflet in the room, and offers your guests a complete selection of your interactive services online.

All-in-one guest service device

Guestmanager is a customized portal which provides your hotel complete centralized control over communication with your guests during their stay. You can easily present your services on the tablet on-line and the guest can navigate directly from the room on the tablet. On the tablet your guests can do check-in or/and check out, book a table in your restaurant, place order by room-service etc. You can present general hotel information and special arrangements –from your desk in the administration.

Important guest statistics

Guestmanager helps you collect important information about user activity and preferences for you marketing and services, which you will access easily trough our cloud solution. Our dynamic Guestmanager Platform offers you a custom made administration portal, which provides you with complete centralized control of content management, guest communication and interactive services.

In cooperation with you and your hotel the Guestmanager is customized to your brand identity through a custom made interface. It will be build to support you and your guests needs from check in to check out. The platform provides you with all the information and statistics you need to build a clear digital strategy towards your guests, which meet all your guests expectations regarding service in the room.

Flexible & Economical

Guestmanager can be integrated with your existing operating system. Guestmanager provides a service that reduces costs and improves the guest experience. Easy to access and update. No big up-front investment. The tablet doesn't work outside the hotel room.
